Learning outcomes

To identify and use the main concepts and terms used in the description of second language acquisition processes

To understand and explain the main theories on Second Language Acquisition
To be able to analyse the methods and methodologies used in the teaching of
foreign languages from the perspective of the findings in Second Language
Acquisition

To realize and to reflect on the features of a good language learner in order to help learners to develop good language learning strategies

Assessment systems

The evaluation system comprises three main elements:

- 1. Active participation in class and in the Online Campus, together with oral presentations in class of one or more assignments (30%)
- 2. Online tasks carried out during the course to be delivered at specific dates (20%). This part will be obligatory for students choosing the global evaluation option and will also be worth 20%.
- 3. Written exam (50%) on the content explained during the course, consisting of either a test and/or questions to be developed in written form to evaluate the knowledge and the know-how of students. It will be necessary to reach at

least 40% of the maximum mark in this exam in order for the student to pass the subject.

The students can opt for a global evaluation of the subject in the different exam periods. In order to do so, they will need to apply for it through the specific virtual link created in the Online Campus. Unless the student specifically completes this link, the default evaluation will be continuous assessment. The deadlines for selecting the global evaluation system will be the first quarter of the semester in which the subject is taught (first and second semester).

Students opting for a global evaluation (see the regulations of the University of Extremadura on this) will sit an exam. The exam will consist in a written part, which will account for 60% of the mark, and an oral presentation, in which students will be asked about the syllabus explained in class (20%). The remaining 20% corresponds to the evaluation of online tasks.
